### About Me

I'm a Javascript Developer, always eager of new technologies and to know the best practices. I focused my studies learning about Javascript programming language and its frameworks, mainly React JS, in which I have the opportunity to work in different projects using it's common patterns and related libraries to solve many kinds of necessities of the current market in a powerful way, even for making web and mobile applications with react native, creating fast and smooth interfaces. I also know W3C standards, Git Flow, Responsive Web Design, REST API, GraphQL, non-relational databases and cross browsing.
